Dillon Morris
Senior Software Engineer

A results-driven Senior Software Engineer with a proven track record of owning the frontend for revenue-critical products and leading complex features from concept to completion. I leverage deep expertise in modern Javascript frameworks to deliver exceptional user experiences and elevate team performance through technical depth and cross-functional collaboration.

EXPERIENCE

Senior Software Engineer, SmartRent   Jun 2024 - Present

- Owns the entire frontend for the company's flagship product, which is responsible for the vast majority of company revenue.

- Executed a full navigation redesign, individually developing all new features including breadcrumbs, favorites, and a modern UI.

- Improved codebase stability and team efficiency by resolving longstanding frontend bugs and leading critical dependency updates.

- Recognized by management as "essential to our success" due to rapid growth into a key technical leader on the team.

UI Engineer, American Express   Jun 2023 - Jul 2024

- Owned the front-end integration of FSSO into a large-scale micro-frontend architecture.

Software Engineer, Formidable   Dec 2020 - Dec 2022

- Improved Fabletics' e-commerce performance and user engagement by migrating the platform to React/Next.js

- Developed a data analysis tool for T-Mobile that boosted sales productivity by 20%.

Early Career (Agency & Startup)   Jun 2018 - Dec 2020

- Developed key features for an enterprise React Native application with 100k+ users, enhancing user engagement and retention.

- Developed a comprehensive design system for a real estate startup to create a more consistent and user-friendly product suite.
